

Morgan Lee

Senior DevOps Engineer

morgan.lee@email.com | (555) 123-4567 | linkedin.com/in/morganlee

SUMMARY

Experienced Senior DevOps Engineer with 7+ years of expertise in designing and implementing CI/CD pipelines, infrastructure automation, and cloud-native solutions. Skilled in optimizing development workflows and building scalable, resilient systems.

SKILLS

CI/CD (Jenkins, GitHub Actions, GitLab CI) | Kubernetes | Docker | AWS, Azure, GCP | Terraform, Ansible, Chef | Python, Go, Bash | Monitoring (Prometheus, Grafana, ELK) | Security Automation | Site Reliability Engineering | Microservices Architecture

PROFESSIONAL EXPERIENCE

Senior DevOps Engineer - Cloud Innovations Inc.

Jun 2020 - Present

- Led migration to Kubernetes, reducing deployment time by 80% and infrastructure costs by 35%
- Designed and implemented GitOps workflow using ArgoCD and Flux
- Built comprehensive observability platform with Prometheus, Grafana, and Jaeger
- Implemented security scanning in CI/CD pipelines, reducing vulnerabilities by 60%
- Mentored junior engineers and established DevOps best practices

DevOps Engineer - Tech Solutions LLC

Mar 2017 - May 2020

- Designed and maintained CI/CD pipelines for 15+ development teams
- Implemented infrastructure as code using Terraform and Ansible
- Managed cloud infrastructure on AWS and GCP
- Automated disaster recovery procedures and backup strategies

Systems Administrator - Global Systems Corp

Jan 2015 - Feb 2017

- Managed Linux servers and network infrastructure
- Implemented monitoring and alerting systems
- Automated routine operational tasks
- Supported development teams with infrastructure needs

EDUCATION

Master of Science in Computer Engineering

Technical University, 2013 - 2015

Bachelor of Science in Computer Science

State University, 2009 - 2013

CERTIFICATIONS

- AWS Certified DevOps Engineer - Professional
- Google Cloud Professional DevOps Engineer
- Certified Kubernetes Administrator (CKA)
- Certified Kubernetes Security Specialist (CKS)
- HashiCorp Certified Terraform Associate

PROJECTS

Multi-Cloud Kubernetes Platform

Designed and implemented Kubernetes platform spanning multiple cloud providers

Automated Compliance Framework

Built framework for continuous compliance monitoring and remediation

Service Mesh Implementation

Led implementation of Istio service mesh for microservices architecture
